Comprehensive solutions for diabetic care
Diabetic solutions for better patient care.

Diabetes is a growing concern for long-term care providers, with 26.9% of people in the United States aged 65 and older affected by the disease.\(^1\)

To address a wide range of diabetic monitoring needs, McKesson Medical-Surgical offers a comprehensive portfolio of accurate, simple and convenient solutions for both single patient use and multiple patient use settings.

Offering our portfolio of advanced-performance diabetes products at competitive prices is just the beginning. We also offer support and guidance to help you and your patients better manage the disease.

---

**Satisfaction Guaranteed**

If you are not completely satisfied with any McKesson Brands product, you may return it for a full refund or credit.

**NEVER COMPROMISE ON CARE\(^\text{SM}\)**

With McKesson Brands, you’ll never have to compromise. We deliver quality products at competitive prices, backed by our 100% satisfaction guarantee. We have decades of experience in the market, and we offer you support and work to help ensure you have the products you need, when you need them – making it even easier for you to provide the best care for your patients.

Lancets

McKesson’s family of lancets is conveniently available in a variety of types, gauge sizes and penetration depths, so you can quickly and comfortably obtain blood samples across a wide range of procedures.
Pressure-Activated Safety Lancets

**McKesson Pressure-Activated Safety Lancets** feature a one-step safety mechanism. Simply hold the lancet against the patient’s fingertip and press down gently. The sterile needle will quickly penetrate skin to draw blood, then immediately retract back inside the safety mechanism. This helps ensure the entire needle is concealed before and after use in order to help minimize infection risk. These lancets are available in three gauge sizes with different penetration depths to provide optimal blood flow for different applications and skin types. Available in three sizes: 21G, 26G and 30G.

**Features**

- Needle is concealed before and after use, minimizing exposure risk
- Exclusive pain mask helps distract attention from needle stick
- Innovative, single-use safety device helps prevent needle stick injuries and cross-contamination
- Sterile, tri-beveled needle for added protection
- Not made with natural rubber latex

McKesson Push-Button Safety Lancets feature a two-step operation with low firing force, offering easy and efficient blood draws at the push of a button. The gamma-sterilized needles are fully covered and protected with a sterility tab before use. Available in three sizes: 17G, 23G and 28G.

Features
- No lancet loading required
- Sterile
- Patented, self-destructing activation mechanism eliminates the possibility of reuse
- High puncture speed helps minimize pain and facilitates healing
- Optimized needle exposure length for adequate blood flow
- Not made with natural rubber latex

**Twist Lancets**

**McKesson Twist Lancets** are designed for capillary blood sampling. They are quick and easy to use, and feature an ultra-sharp tip for smooth and fast procedures. While their universal design fits most lancing devices, McKesson Twist Lancets may also be used without a lancing device. These lancets are non-safety and sterile. Available in two sizes: 28G and 30G.

**Features**
- Tri-bevel tip
- Consistent depth penetration
- Designed to facilitate virtually painless sampling
- Single use only; sterile
- Not made with natural rubber latex

Blood Glucose Monitoring Systems

McKesson offers a portfolio of four quality blood glucose monitoring systems that are all no-code, simple to use and feature the latest technology. Compatible test strips and control solutions are available with each meter. Refer to our Product Selection Guide on page 13 to find the meter best suited for your patient needs and setting.
COMPREHENSIVE SOLUTIONS FOR DIABETIC CARE

Blood Glucose Monitoring Systems

**Single and Multiple Patient Use Settings**

The Food and Drug Administration (FDA) requires blood glucose monitoring system manufacturers to indicate whether the device is intended for single patient use, multiple patient use, or both. There are differing requirements for single use devices when compared to multi-use devices in regards to labeling, an intended use statement, safety instructions and cleaning and disinfection procedures.²

Be mindful of the FDA’s recommendations by ordering the blood glucose monitoring system suitable for your intended use and adhering to the manufacturer’s cleaning and disinfection procedures. More information, see the inserts enclosed in the back cover.

Blood glucose monitoring systems cleared for single patient use are suitable for use by individuals in private home settings only. Systems cleared for multiple patient use are suitable for multiple patient facilities and physician offices.
McKesson QUINTET AC®
Blood Glucose Meter
For Single and Multiple Patient Use

The McKesson QUINTET AC® Blood Glucose Meter has been specially designed for the needs of clinicians concerned with patient diabetes management. Advances in technology provide features designed for a multiple patient environment; however this product is also approved for use for self-testing. The system features auto coding, which allows it to automatically calibrate using McKesson QUINTET AC® Blood Glucose Test Strips for quick and accurate testing. The product also features a large memory capability, minimal sample size and an easy-to-read LCD screen with backlight.

Features

- Auto coding for quick and accurate testing
- Alternate test sites: fingertip & forearm
- Results in 5 seconds
- Large memory; capable of recording up to 500 tests
- Calculates daily, weekly and monthly averages to better monitor your blood glucose

McKesson QUINTET AC® Blood Glucose Meter (For Single and Multiple Patient Use) Includes:
Carrying Case, Owner’s Manual, Meter, Getting Started Guide, (2) 3 Volt batteries (installed)

**McKesson TRUE METRIX® Self-Monitoring Blood Glucose System**

*For Single Patient Use*

The McKesson TRUE METRIX® Self-Monitoring Blood Glucose System is intended for the quantitative measurement of glucose (sugar) in fresh capillary whole blood samples drawn from the fingertip or forearm. It is intended to be used by individual patients in home care settings or in facilities where the meter is not shared between patients. Featuring TRIPLE SENSE TECHNOLOGY™, the system automatically detects, analyzes and corrects for environmental and physiological variability, including hematocrit and temperature, resulting in improved precision and accuracy. Designed for use only with McKesson TRUE METRIX® Blood Glucose Test Strips and Control Solutions.

**Features**

- No coding required
- Results as fast as 4 seconds
- Tiny 0.5 microliter sample size
- Alternate site testing (fingertip or forearm)
- Stores up to 500 results with time/date
- Event tagging
- 4 testing reminder alarms
- Audible fill detection for blood or control sample

McKesson TRUE METRIX® PRO Professional Monitoring Blood Glucose Meter

For Multiple Patient Use

The McKesson TRUE METRIX® PRO Professional Monitoring Blood Glucose Meter is intended to be used for the quantitative measurement of glucose (sugar) in fresh capillary whole blood samples drawn from the fingertip or forearm and venous whole blood. It is intended for multiple-patient use in professional healthcare settings. The meter features TRIPLE SENSE TECHNOLOGY™ and offers enhanced lifestyle management features, such as event tags and testing reminders. Designed for use only with McKesson TRUE METRIX® PRO Professional Monitoring Blood Glucose Test Strips and TRUE METRIX® Control Solutions.

Features

- No coding required
- Results as fast as 4 seconds
- Tiny 0.5 microliter sample size
- Alternate site testing (fingertip or forearm)
- Stores 500 results with time/date with 7-, 14- and 30-day averaging
- Event tagging
- 4 testing reminder alarms

- Ketone test reminder
- Easy-to-use strip release button
- Data-management capabilities
- Featuring TRIPLE SENSE TECHNOLOGY™, system automatically detects, analyzes and corrects for environmental and physiological variability for proven accuracy
 McKesson TRUEresult® Blood Glucose Monitoring System

For Single and Multiple Patient Use

The McKesson TRUEresult® Blood Glucose Monitoring System offers a no-code and easy-to-use way to help clinicians and patients alike manage diabetes. Known for its high quality performance, the TRUEresult® glucose metering system is lightweight and small enough to fit in the palm of your hand. It requires no coding for easier testing and has a large display screen to view and track both current and past results. Designed for use with McKesson TRUEtest® Blood Glucose Test Strips and Control Solutions.

Features

- No coding
- Tiny, 0.5 microliter blood sample
- Results as fast as 4 seconds
- Easy-to-use strip release button
- Stores 500 results with time/date with 7-, 14- and 30-day averaging
- 4 testing reminder alarms
- Alternate site testing (fingertip or forearm)
- Approved for venous and capillary testing
- Data management capabilities

McKesson TRUEresult® Blood Glucose Monitoring System Meter Kit (For Single and Multiple Patient Use) Includes:

- McKesson TRUEresult® Meter, Installed 3-Volt Battery, Lancing Device, 10 Lancets, 10 McKesson TRUEtest® Test Strips, Owner’s Manual, Self-Test Log Book & Compact Carrying Case

McKesson TRUEresult® Blood Glucose Meter (For Single and Multiple Patient Use) Includes:

- McKesson TRUEresult® Meter, Installed 3-Volt Battery, Owner’s Manual, Self-Test Log Book & Compact Carrying Case

McKesson TRUEtest® Blood Glucose Test Strips

- Uses TRUEtest® Strips featuring Quad-Electrode Laser Accuracy

THERAPY for the SKIN
Non-allergenic and Non-sensitizing

As many as 33 percent of people with diabetes will have a skin disorder caused or affected by diabetes. Our THERA™ Advanced Skin Care product line can help you address your patients’ skin issues and irritations, including those commonly related to diabetes such as bacterial growth, fungal irritations and itching. Infused with an all-in-one proprietary blend of vitamins and nourishing ingredients called SAFFLEX™, our eight THERA products work together to help cleanse, moisturize, protect and treat skin irritations.

INFUSED WITH SAFFLEX™ VITAMIN COMPOUND
Each product in the THERA™ Advanced Skin Care line is enriched with an all-in-one proprietary blend of vitamins and nourishing ingredients called SAFFLEX™. It contains:

- Vitamin E acetate
- Vitamin C
- Vitamin B3
- Vitamin B5
- Vitamin B6
- Safflower seed oil
- Hyaluronic acid
- Lavender-Ylang fragrance
- Bisabolol (an extract of chamomile)
- Ginger root extract

“I have provided care for over 20 years to patients with fragile and compromised skin, and I am very proud to support the THERA™ Advanced Skin Care products. All of the products are formulated with SAFFLEX™ to aid in soothing and nourishing the skin while providing clinicians with an optimal skin care system for their patients.”

Mary Petersen,
RN, BSN, CWOCN
